

**2.4 GHz wireless  
keyboard and mouse  
KM-090RF  
Manual**

**1. CONTENTS**

The Connectland wireless keyboard and mouse kit is included with the following accessories:  
a USB wireless 2.4 GHz receiver, four batteries LR03 AAA 1.5V, a CDROM and a Quick User's Guide.  
Please contact immediately your vendor if one them is missing.

**2. INSTALLATION**

Mouse

- a) Press battery cap button and open battery cap.
- b) Insert two LR03 AAA 1.5V batteries (caution to the polarity)
- c) Switch on the mouse.

Keyboard

- a) Turn keyboard on its rear side, and then release the cap of battery compartment.
- b) Insert two LR03 AAA 1.5V batteries (caution to the polarity). Replace the cap.

Plug the USB receiver into your computer's USB port.  
System will recognize the new USB devices and installed by itself. The user will see "device can be used", after successfully installed. If user shuts down computer or pulls out receiver over 5 seconds, the power of mouse will be automatically shut off. To wake up it, user must reinsert receiver into USB port of computer (if the receiver is pulled out) and press the key of mouse. This is automatic power saving function.

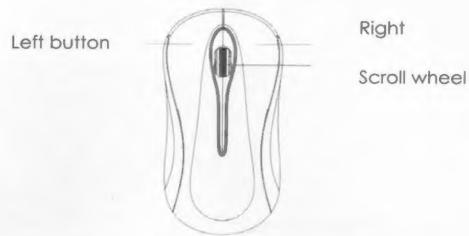

**3. SYSTEMS SUPPORTED**

The keyboard and mouse set is compliant with the following operating systems:

- Microsoft Windows ME/2000/2003/XP/VISTA  
(Insert the Windows CDROM if asked)
- IBM and PC compatible
